

Radoslaw Holubowski

Hi, I'm Radek and I am passionate about all JavaScript. I work hard, I care about writing clean code and I really love learning. I am currently looking for the right opportunity to work in an environment that will help me progress into a full-stack role.

Skills

Technical:

HTML, CSS

JavaScript

React

Node

CSS Modules

Rest API

TypeScript

SQL

MongoDB

Git

CSS Frameworks:

Tailwind

Non Technical:

Strong Verbal Communications

Team oriented

Accountable

Experience

Node.js Advance - Testing | Deployment | Application Architecture | Git

18.04.2022 - 22.05.2022 - Present

- Basic Concepts of Software Testing.
- Implementing the test process on a Test Management Tool (JEST)
- Write tests for error handling
- Advanced unit testing techniques using Jest
- Integration tests for Node apps
- Understand how Git works behind the scenes
- Mastering the essential Git workflow: adding & committing
- Perform Git merges and resolve merge conflicts.
- Work with Git branches.
- Undo changes using git restore, git revert, and git reset.
- Mastering collaboration workflows: pull requests, "fork & clone", etc.

Full-Stack Developer - React

28.02.2022 - 03.04.2022

- Build powerful, fast, user-friendly and reactive web apps
- Utilized GraphQL API to perform CRUD functionality to update the UI.
- Provide amazing user experiences by leveraging the power of JavaScript with ease
- Learn about React Hooks and React Components
- Learn how to combine TypeScript with ReactJS.

TypeScript

10.01.2022 - 13.02.2022

- TypeScript and its Features like Types, ES6 Support, Classes, Modules, Interfaces
- Learn how to combine TypeScript with NodeJS / Express.
- Maintained and refactored websites and user interfaces.
- Utilized chrome debugger to test and fix UI frontend bugs.
- Learn TypeScript both in theory as well as applied to real use-cases and projects

Languages:

English

Polish

Database - MySQL & MongoDB

22.11.2021 - 26.12.2021

- Database types - RDBMS(MySQL) & NoSQL(MongoDB)
- Database Indexing, Stored Procedures & Transactions...
- Basic to advanced SQL queries with complex data-structures
- NoSQL database structure designing using MongoDB

Framework Express.js

04.10.2021 - 07.11.2021

- Understanding the basics of HTTP and the request/response cycle.
- Operate that Express Server as a REST API.
- Using that Express Server to render front-end web pages with handlebars.

Node.js

16.08.2021 - 19.09.2021

- Learning the basics as well as advanced concepts of NodeJS.
- NodeJS ecosystem, NPM and Yarn Command.
- The Model View Controller (MVC).
- Event Emitter, Async Await patterns.
- Cryptography and Streams in Node.js.
- Module HTTP

JavaScript

28.06.2021 - 01.08.2021

- JavaScript fundamentals: variables, if/else, operators, boolean logic, functions, arrays, objects, loops, strings, etc.
- Modern OOP: Classes, constructors, prototypal inheritance, encapsulation, etc.
- Asynchronous JavaScript: Event loop, promises, async/await, AJAX calls and APIs
- Modern tools for 2022 and beyond: NPM, Parcel, Babel and ES6 modules
